

HERITAGE MINILINE - CAST IRON

Heritage Miniline pillars provide an extremely robust yet aesthetic solution to the requirement for Service pillars in areas of high population density where pavement space is at a premium. Apart from the in-fill panels, the complete cabinet is made from cast iron and can accommodate a variety of equipment including fuse switchgear, contactors and street lighting controlgear.

Dimensions (mm)

Miniline code	12855	12893	A24046
Height above Ground (H)	711	917	930
