

A. Backplate

B. back plate fixing

1. Installation must be carried out in accordance with current Building & Wiring Regulations.
2. Isolate the mains supply before connection
3. Secure backplate (A.) to a vertical surface. Ensure the plate is level (fixings not included.)
4. Secure the fixture to the back plate by the 4 grub screw fixings provided (B.)
5. Connect to mains supply using power lead supplied (230v input)
6. Re-connect the mains power supply.
7. For dimmable versions please use 2nd dimming cable to wire into your dimming system observing the correct polarity.

Maintenance

The products should be cleaned as part of a general maintenance cycle to maintain optimum performance.

Service

The product should be returned to Ark Lighting for us for repair or servicing.
